

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Original) A method of conducting a network-based interview comprising:
 - creating at least one online questionnaire residing on a web site wherein access to said web site is protected by at least an interviewee specific password;
 - providing automated email tools for creating email templates and generating an automated email campaign and sending at least one of an introductory email, a first and a second reminder email, and a late notice email;
 - providing management tools for managing and tracking the progress of the completion of said questionnaire by each interviewee;
 - providing data management tools for determining and documenting response data collected from said online questionnaires; and
 - providing reporting tools for generating reports based on the data collected from said online questionnaires.

2. (Original) An apparatus for conducting an online interview campaign comprising:
 - a web server capable of generating web pages and allowing at least one administrator and at least one user to connect to an application server over a global network;
 - an application server hosting a business logic capable of generating online questionnaires residing on web sites hosted by said web server, and providing tools allowing said administrator to organize and manipulate data generated from said user's responses to said online questionnaires whereby said data generated from said user's responses are used in determining and documenting tax data;
 - a database for storing said tax data generated from said online questionnaires.

3. (Originally numbered 4) A network-based method for determining and documenting tax data comprising:

creating at least one online questionnaire residing on a web site and wherein access to said web site is protected by at least an interviewee specific password;

providing management tools to an administrator managing said online questionnaire process wherein said management tools includes at least one of

providing a tracking tool allowing the administrator to track the progress of the completion of said questionnaire by each interviewee,

providing an email management tool allowing the administrator to generate an email campaign related to the online questionnaire, and

providing a report generation tool allowing the administrator to generate tracking reports; and

providing data organization tools allowing the administrator to document and determine tax data based on the response data collected from interviewee questionnaire .

4. (Originally numbered 5) A computerized network-based method comprising:

obtaining tax data using at least one online questionnaire residing on a password protected web site;

providing administration tools for organizing and documenting said tax data; providing report generating tools; and

using said report generating tool and said tax data to generate reports used in documenting and determining tax credit.

5. (Originally numbered 6, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 wherein said tax data is R&D tax credit data.

6. (Originally numbered 7, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

establishing contest criteria for potential interviewees; and

awarding contest awards to one or more potential interviewees based upon their performance relative to said contest criteria.

7. (Originally numbered 8, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to an administrator for setting up interviews each year; and storing historical data by year for each year.

8. (Originally numbered 9, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing an employee and department management tool to an administrator whereby said tool allows the administrator to decide which department and which employee will be interviewed.

9. (Originally numbered 10, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to an administrator to perform at least one of add, delete and change employees and departments.

10. (Originally numbered 11, **Currently Amended**) A computerized network-based method as recited in claim [[5 w]] 4 further comprising:

providing a tool to pre-populated data in said questionnaires general information section.

11. (Originally numbered 12, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to insert password information for secured access to site by users..

12. (Originally numbered 13, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to insert email address for automatic email.

13. (Originally numbered 14, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to an administrator to view a questionnaire while its being completed by those being interviewed.

14. (Originally numbered 15, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to an administrator to edit a questionnaire.

15. (Originally numbered 16, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to an administrator for viewing employees in a department in groups.

16. (Originally numbered 17, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to automate an email system whereby the administrator may setup said system to automatically send at least one of: introduction email, a first reminder notice, a second reminder notice, and a late notice.

17. (Originally numbered 18, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a report application tool to an administrator, whereby the administrator may generate a tracking report of the completion of questionnaires; and

providing a matrix reporting tool to an administrator, whereby the interviewee may access the results of his responses to said questionnaire and correct for any errors.

18. (Originally numbered 19, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a security tool to an administrator wherein access to the web site is by using at least one of limiting access using IP addresses and limiting access by assigning interviewee specific passwords.

19. (Originally numbered 20, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing a tool to enable the administrator to view who has access to their site.

20. (Originally numbered 21, **Currently Amended**) A computerized network-based method as recited in claim [[5]] 4 further comprising:

providing interviewees help options by providing at least one of:
instructions, history, prizes, definitions, FAQ, samples and help.

21. (Originally numbered 22, **Currently Amended**) A computerized network-based method as recited in claim [[21]] 20 further comprising:

providing said interviewees a tool to attach supporting documents with their responses to said questionnaire.
